

Dear Parent/Guardian –

Nasal Flu spray vaccination - If you have not already consent, please do so as the portal will CLOSE in 48hrs.

If your child suffers with asthma, have they experienced any of the following:

- Increased inhaler use
- Wheezy 72hrs before school vaccination date
- Taken oral steroids within 14 days

Then you MUST call email [school.immunisation@mpft.nhs.uk](mailto:school.immunisation@mpft.nhs.uk), as your child may not be able to receive their vaccination.

If this occurs on the day of the vaccination session, then please inform your child's school so that a message can be passed to one of the nursing team attending the vaccination session.

Many thanks,

School Age Immunisation Team
